Economic Security Report Higher Education Planning Guide

Published: October 2021

(Based on 2019 wages)

Arkansas Economic Security Report Higher Education Planning Guide

Students and Families,

The Arkansas Economic Security Report Higher Education Planning Guide fulfills the mandate under A.C.A. § 6-60-105 to provide students and families with employment and income information for recent graduates from Arkansas' higher education institutions.

Regardless of where you are in your college and career planning process, the real-world data summarized in this guide will help you make informed decisions when choosing which college to attend and field-of-study to pursue.

For example, you can answer questions like:

- *What percentage of graduates in a particular field-of-study are employed?*
- *What is their average annual income?*
- *Which institutions offer programs in a particular field-of-study?*
- *What are the average outcomes for students who graduate from specific college?*

We hope that the Higher Education Planning Guide is a useful tool as you decide which path you want to follow.

Arkansas Division of
Workforce Services

How to Use the Higher Education Planning Guide

The Higher Education Planning Guide summarizes employment and earnings outcomes for graduates from 96 programs across 37 colleges. This guide is based on employment and wage data from 2019.¹ The guide is organized around fields-of-study.² Use the table of contents to locate the programs you want to learn more about.

If you do not yet know what you want to study in college, there are some great resources out there. For instance, the website “My Next Move” (<https://www.mynextmove.org/>) allows you to search for particular jobs, or just answer some survey questions about the kinds of things you like to do—and the site will then tell you all the best jobs that you might be interested in. Appendix C lists the crosswalk between occupations and programs of study with the relevant link to My Next Move.

When you look up a particular program in the guide, you will find one or two pages of information broken up into three sections. To illustrate, consider Computer and Information Sciences on page 21.

The first section summarizes graduates’ first year outcomes. It includes a dial chart that shows that 23 percent of the 2018 graduates in Computer and Information Sciences were employed in Arkansas in 2019, and on average, they earned \$53,131 in their first year after graduating. The first section also includes badges indicating that Computer and Information Sciences is a High Demand and High Wage program of study.

The second section shows how annual earnings change as graduates gain more work experience. It includes a multi-panel chart that provides average earnings for workers between one and five years after graduating with various types of degrees (e.g., certificate, bachelor’s, master’s, etc.). For Computer

¹ 2020 was an unusual year in many ways, and the employment and wage data from that year are unlikely to reflect the long-term value of college credentials. For that reason, we use 2019 data for the employment and earnings statistics in this report.

² To protect privacy, any program of study and/or institution with fewer than 11 graduates in 2018 does not appear in this guide.

and Information Sciences, we can see that, on average, workers with a bachelor’s earned roughly \$54,000 in their first year, but that figure grows to \$68,000 in their fifth year.

The final section provides comparative information about the specific higher education institutions that offer the selected program of study. Going back to our example, we can see that 76 percent of Arkansas Tech’s 2018 graduates with bachelor’s degree in Computer and Information Sciences were employed in their first year earning \$51,837. Similarly, University of Arkansas – Fort Smith’s graduates were 74 percent employed earning \$53,605.

Education Level	College or University	2018 Graduates	Employed In-State	Average 2019 Earnings
Bachelor	Arkansas Tech University	21	76%	\$51,837
Bachelor	University of Arkansas at Little Rock	28	46%	\$43,589
Bachelor	University of Arkansas Fayetteville	51	51%	\$63,133
Bachelor	University of Arkansas - Fort Smith	34	74%	\$53,605
Bachelor	University of Central Arkansas	73	68%	\$49,968
Master	Arkansas Tech University	31	45%	\$89,371

While the information summarized in in this guide has clear value, the data have a significant limitation to keep in mind when using this report. The employment and earnings data do not capture federal employees, members of the military, many self-employed people, and anyone employed outside of Arkansas.³

If a student from Dallas, Texas attends the University of Arkansas and then returns to Dallas after graduation, we do not currently have data on whether that person is employed or what their earnings are. They appear in the graduate count, but do not contribute to the employment or earnings figures. Thus, the employment rate is likely somewhat understated and average earnings may be higher or lower depending on the earnings of those people we do not observe in the data.

³ In the future, we hope to work with other states to get employment and earnings data from outside Arkansas.

Methodology and Definitions

Data Sources

The wage data in this report come from the unemployment insurance wage records maintained by the Arkansas Division of Workforce Services. Unemployment insurance is a joint state-federal program in which employers in Arkansas send in data every quarter on who works for them and how much money they earn, and pay a small insurance fee that helps pay for unemployment insurance. Note that this data system does not include employment outside of Arkansas, federal or military jobs, or any employed Arkansans who are not reported to the Arkansas Division of Workforce Services.

The data on who graduates from where, and what they studied, comes from the Arkansas Division of Higher Education.

Colleges/Universities Included

Arkansas' A.C.A. § 6-60-105 requires that this report include graduates from "state-supported institutions of higher education." For this report, we were able to include data on most private institutions as well.

The institutions covered in this report thus include:

Arkansas Northeastern College	Philander Smith College
Arkansas State University Beebe	Phillips Community College of the U A
Arkansas State University Jonesboro	South Arkansas Community College
Arkansas State University Mountain Home	Southeast Arkansas College
Arkansas State University Newport	Southern Arkansas University - Magnolia
Arkansas Tech University	Southern Arkansas University - Tech
Baptist Health College Little Rock	U A Community College at Batesville
Black River Technical College	U A Community College at Hope
College of the Ouachitas	U A Community College at Morrilton
Cossatot Community College of the U A	University of Arkansas at Little Rock
East Arkansas Community College	University of Arkansas at Monticello
Harding University	University of Arkansas at Pine Bluff
Henderson State University	University of Arkansas Fayetteville
Jefferson School of Nursing	University of Arkansas for Medical Sciences
John Brown University	University of Arkansas - Fort Smith
National Park College	University of Arkansas - Pulaski Technical College
North Arkansas College	University of Arkansas - Rich Mountain
Northwest Arkansas Community College	University of Central Arkansas
Ozarka College	

Education Levels

The report often compares earnings and employment at different degree “levels.” Here’s a chart showing what is meant by each level:

Education Level	What it includes	Notes
Certificate	Certificate of Proficiency Technical Certificate Advanced certificate	Technical certificates achieved after high school (such as electrical and power transmission installation, nursing assistants, or fire protection)
Associate	Associate Degree	2-year degrees
Bachelor	Baccalaureate Degree Post-baccalaureate certificate	4-year college degrees, plus certain additional specialized certificates beyond a bachelor’s degree (such as information technology, gifted and talented education, dyslexia therapy, and more)
Master	Master’s Degree Specialist degree	Master’s degrees that typically take 1 or 2 years beyond a bachelor’s degree. For purposes of this report, this category includes the MBA degree.
Doctoral	Doctoral degree First professional degree Post-first professional certificate Post-first professional degree Doctor’s Degree – Research/Scholarship Doctor’s Degree – Professional Practice Doctor’s Degree – Other	This includes medical degrees, Ph.Ds., and law degrees.

First-year wages

This means the first full calendar year after someone graduates from college or a certificate program. For example, if someone graduates in 2018 (which typically happens around May/June), their first-year earnings will be what they earned from Jan. 1, 2019 to Dec. 31, 2019.

As noted above, the Arkansas wages data used for this report do not include employment outside of Arkansas, federal or military jobs, or any employed Arkansans who are not reported to Arkansas unemployment insurance. Instead, we can only include wages that are reported to the Arkansas Department of Workforce Services.

Which Degree Counts?

If someone possesses multiple degrees or certificates, we report on the highest credential earned and/or the most recent one earned. For example, if someone has a bachelor’s degree and a master’s degree, we would report on the master’s degree earnings. And if a certificate in air conditioning repair and then the next year gets a certificate in electrical installation, then if that person’s wages are in this report at all, it will be included on the page for electrical installation certificates. The timeframe we are using to find this highest credential earned for an individual is 2008-2018.

Earnings Growth Trends

To the extent we have enough data, we include charts that show how wages are different for people who graduated in earlier years (i.e., 1-year, 2-year, 3-year, 4-year, and 5-year earnings). **Note: This is NOT following the same people over time.** Instead, it means that in 2019, the 1-year earnings are from people who graduated in 2018, the 2-year earnings are from people who graduated in 2017, and so on.

These are completely different groups of people who graduated into different labor markets, and sometimes there are slight discrepancies in that, for example, the 5-year earnings are lower than you'd expect. This is not because anyone got a pay cut in their fifth year of work. It's because the people who happened to graduate in 2014 might be working in different places than the people who graduated in 2016 or 2018. Moreover, if someone got a bachelor's degree in 2014 and then a master's in 2015, their earnings in 2019 will be attributed to the master's degree in 2015—note that this could in turn affect the employment and earnings figures for the people who had a “bachelor's degrees in 2014,” because someone in that group moved to a different group (“master's degrees in 2015”).

Full-time Employment

The concept of “employment” is on a sliding scale. For example, imagine that someone was employed for one day in 2019 and made \$100 total. Should that person be counted as “employed” in 2019, with a really low wage? Or should that person be counted as basically unemployed in 2019? What if they work for 2 days? 3 days? 30 days? And so forth.

But we have to draw a line somewhere. Here's what we do for this Guide: When we say that someone is “full-time employed” in a given year, we mean that their total wages for the year were at least \$14,430. This is based on what someone making 2019 minimum wage of \$9.25 an hour would earn working for 30 hours a week for the full year.

We think this is a good place to draw the line, because anything less than 30 hours a week at minimum wage is not enough to be counted as working “full-time” for the year.

Current Enrollment

If we know that someone is still enrolled in school (for example, graduate school) even after graduating, then we don't count that person's wages or employment, even if it might otherwise fit the definition of “full-time” employment. That is because it could be misleading. For example, if someone attends graduate school in engineering while working 30 hours a week at a restaurant to pay for school, the restaurant earnings don't really tell you anything about the job market for *engineers*.

Number of People Included

For this Guide to include the graduates of a particular degree program, there had to be a minimum of 11 people who: Attended a particular institution, and

- Studied a particular field/major (that is, in a particular CIP category), and
- Graduated in 2018 (or any other specific year), and
- Had a degree at a particular level (e.g., bachelor's, master's, etc.), and
- Had wages reported in 2019.
- Had met the full-time employment criteria for the wages reported in 2019.

If there are 10 or fewer people in one or more of those categories, then we didn't include the wages and employment for that particular program in that year. Also, based on this criteria, certain program of

study, education level, or colleges/universities may not be included in this report. That is to protect individual privacy.

CIP codes

This term refers to the Classification of Instructional Programs as defined by the U.S. Department of Education. These codes are basically a complete list of all the possible programs at universities in the United States. For example, 04.0501 is Interior Architecture, while 14.0601 is Ceramic Sciences and Engineering. CIP codes can be general or specific. At the most general level, there are a few dozen broad series, like 01 for Agriculture. Then, there are more specific categories with 4 digits, like 01.01 for “Agricultural Business and Management.” Then there are even more specific classifications with 6 digits, such as 01.0106, for “Agricultural Business Technology.” In this report, we focus on the 4-digit categories, because the 6-digit listings get so specific that they aren’t very useful if you’re trying to figure out a college major.

Major Groups

Major Group	2-Digit CIP Code	2-Digit CIP Family Title

	49	Transportation & Materials Moving

The mappings for the Major Group classifications are based on the information used on this report: Zaback, K., Carlson, A., & Crellin, M. (2012). Postsecondary degrees: A state and national level analysis (ED540267). ERIC. <https://files.eric.ed.gov/fulltext/ED540267.pdf>

SOC codes

This term refers to the Standard Occupational Classification system used by federal agencies like the Bureau of Labor Statistics and the Census Bureau. These codes are meant to classify basically every job within the American economy, everything from pharmacy aides (31-9095) to meter readers (43-5041) to armored assault vehicle crew members (55.3013).

Mapping CIP codes to SOC codes

In Appendix C, we provide a table that maps CIP codes to SOC codes. This sounds very technical, but it just means mapping college majors to possible careers/jobs, so that you can see whether a particular major is likely to lead to a particular job. SOC codes and CIP codes don't always match up perfectly because people can do many things with an economics degree (for example), while there are many occupations (such as “gambling service worker”) that don't have any college degree or major associated with them.

Even so, there are many thousands of such combinations. We focused on around 340 matches where 1) there is a strong match according to the National Research Center for Career and Technical Education, 2) there is at least one job in Arkansas, and 3) there was at least one graduate who completed their post-high school education in Arkansas.

Note: We do *not* have actual data on what jobs people actually hold. The point here is just to tell you which majors/degrees/certificates are *likely* to be related to which jobs.

High Demand (Targeted Credentials)

On some of the charts, you'll see that a particular program of study is flagged as “High Demand.” Here's what that means. The Arkansas Division of Higher Education has a strategic plan called Align Arkansas 2026 (<https://www.adhe.edu/about-adhe/master-plan9/>). One of the main goals of this plan is to increase the number of people in Arkansas who have so-called “targeted credentials” by 2026. Targeted credentials are simply degrees where there is higher-than-average demand in the job market, as well as a gap between the market demand and the number of graduates. Thus, for example, expert predictions suggest that there are currently not enough graduates in several dozen fields, including everything from funeral science to forestry to teacher education to registered nurses. The goal is to increase the number of graduates with those high-demand credentials.

High Wage

In our charts, we flag as “high wage” the programs of study that have an average wage greater than the average across all credentials.

Charts with different wage scale

On the trend charts that show the wages by education level, some of the charts have a higher y-axis scale to show the wages. The trend lines, axis labels and the dial chart above are all displayed in green for these sections, to highlight the scale change.

Occupation to Program of Study Crosswalk

Occupation Title	Occupation Code (SOC)	Education Program Title	Education Program Code (CIP)	Education Level Required
Accountants and Auditors	13-2011	Accounting and Related Services.	52.03	Bachelor
Administrative Law Judges, Adjudicators, and Hearing Officers	23-1021	Law.	22.01	Doctoral
Administrative Services Managers	11-3011	Business Administration, Management and Operations.	52.02	Bachelor
Administrative Services Managers	11-3011	Business/Commerce, General.	52.01	Bachelor
Adult Basic and Secondary Education and Literacy Teachers and Instructors	25-3011	Teacher Education and Professional Development, Specific Levels and Methods.	13.12	Bachelor
Adult Basic and Secondary Education and Literacy Teachers and Instructors	25-3011	Teaching English or French as a Second or Foreign Language.	13.14	Bachelor
Advertising and Promotions Managers	11-2011	Marketing.	52.14	Bachelor
Advertising and Promotions Managers	11-2011	Public Relations, Advertising, and Applied Communication.	09.09	Bachelor
Aerospace Engineers	17-2011	Electrical, Electronics and Communications Engineering.	14.10	Bachelor
Aerospace Engineers	17-2011	Mechanical Engineering.	14.19	Bachelor
Aircraft Mechanics and Service Technicians	49-3011	Vehicle Maintenance and Repair Technologies.	47.06	Certificate
Animal Scientists	19-1011	Animal Sciences.	01.09	Bachelor
Anthropologists and Archeologists	19-3091	Anthropology.	45.02	Master
Arbitrators, Mediators, and Conciliators	23-1022	Law.	22.01	Bachelor
Architects, Except Landscape and Naval	17-1011	Architecture.	04.02	Bachelor
Architectural and Engineering Managers	11-9041	Biological/Biosystems Engineering.	14.45	Bachelor
Architectural and Engineering Managers	11-9041	Biomedical/Medical Engineering.	14.05	Bachelor
Architectural and Engineering Managers	11-9041	Chemical Engineering.	14.07	Bachelor

(To protect privacy, some of these programs may not appear in the Program of Study Report).

CIP Category Code	CIP Category Name
01.00	Agriculture, General.
01.01	Agricultural Business and Management.
01.02	Agricultural Mechanization.
01.03	Agricultural Production Operations.
01.06	Applied Horticulture and Horticultural Business Services.
01.08	Agricultural Public Services.
01.09	Animal Sciences.
01.10	Food Science and Technology.
01.11	Plant Sciences.
01.99	Agriculture, Agriculture Operations, and Related Sciences, Other.
03.01	Natural Resources Conservation and Research.
03.02	Natural Resources Management and Policy.
03.05	Forestry.
03.06	Wildlife and Wildlands Science and Management.
04.02	Architecture.
04.06	Landscape Architecture.
05.01	Area Studies.
09.01	Communication and Media Studies.
09.04	Journalism.
09.07	Radio, Television, and Digital Communication.
09.09	Public Relations, Advertising, and Applied Communication.
09.99	Communication, Journalism, and Related Programs, Other.
10.03	Graphic Communications.
11.01	Computer and Information Sciences, General.
11.02	Computer Programming.
11.03	Data Processing.
11.04	Information Science/Studies.
11.05	Computer Systems Analysis.
11.07	Computer Science.

CIP Category Code	CIP Category Name
11.08	Computer Software and Media Applications.
11.09	Computer Systems Networking and Telecommunications.
11.10	Computer/Information Technology Administration and Management.
12.03	Funeral Service and Mortuary Science.
12.04	Cosmetology and Related Personal Grooming Services.
12.05	Culinary Arts and Related Services.
13.01	Education, General.
13.03	Curriculum and Instruction.
13.04	Educational Administration and Supervision.
13.05	Educational/Instructional Media Design.
13.06	Educational Assessment, Evaluation, and Research.
13.09	Social and Philosophical Foundations of Education.
13.10	Special Education and Teaching.
13.11	Student Counseling and Personnel Services.
13.12	Teacher Education and Professional Development, Specific Levels and Methods.
13.13	Teacher Education and Professional Development, Specific Subject Areas.
13.14	Teaching English or French as a Second or Foreign Language.
13.99	Education, Other.
14.01	Engineering, General.
14.03	Agricultural Engineering.
14.05	Biomedical/Medical Engineering.
14.07	Chemical Engineering.
14.08	Civil Engineering.
14.09	Computer Engineering.
14.10	Electrical, Electronics and Communications Engineering.
14.12	Engineering Physics.
14.19	Mechanical Engineering.
14.27	Systems Engineering.
14.33	Construction Engineering.
14.35	Industrial Engineering.
14.42	Mechatronics, Robotics, and Automation Engineering.

CIP Category Code	CIP Category Name
14.45	Biological/Biosystems Engineering.
15.00	Engineering Technology, General.
15.03	Electrical Engineering Technologies/Technicians.
15.04	Electromechanical Instrumentation and Maintenance Technologies/Technicians.
15.05	Environmental Control Technologies/Technicians.
15.06	Industrial Production Technologies/Technicians.
15.08	Mechanical Engineering Related Technologies/Technicians.
15.09	Mining and Petroleum Technologies/Technicians.
15.10	Construction Engineering Technologies.
15.11	Engineering-Related Technologies.
15.12	Computer Engineering Technologies/Technicians.
15.13	Drafting/Design Engineering Technologies/Technicians.
15.14	Nuclear Engineering Technologies/Technicians.
15.15	Engineering-Related Fields.
15.99	Engineering Technologies/Technicians, Other.
